Specialists In Automation

“Having been established since 1963, we are a real family business with real values”

The workshop skills have been handed down from father to son, why not call into the showroom, where Ian and Jill hope will share with you their expertise and experience and help you select from the 14 various styles that are on display in their showroom. Additionally there is now a range of Estates gates

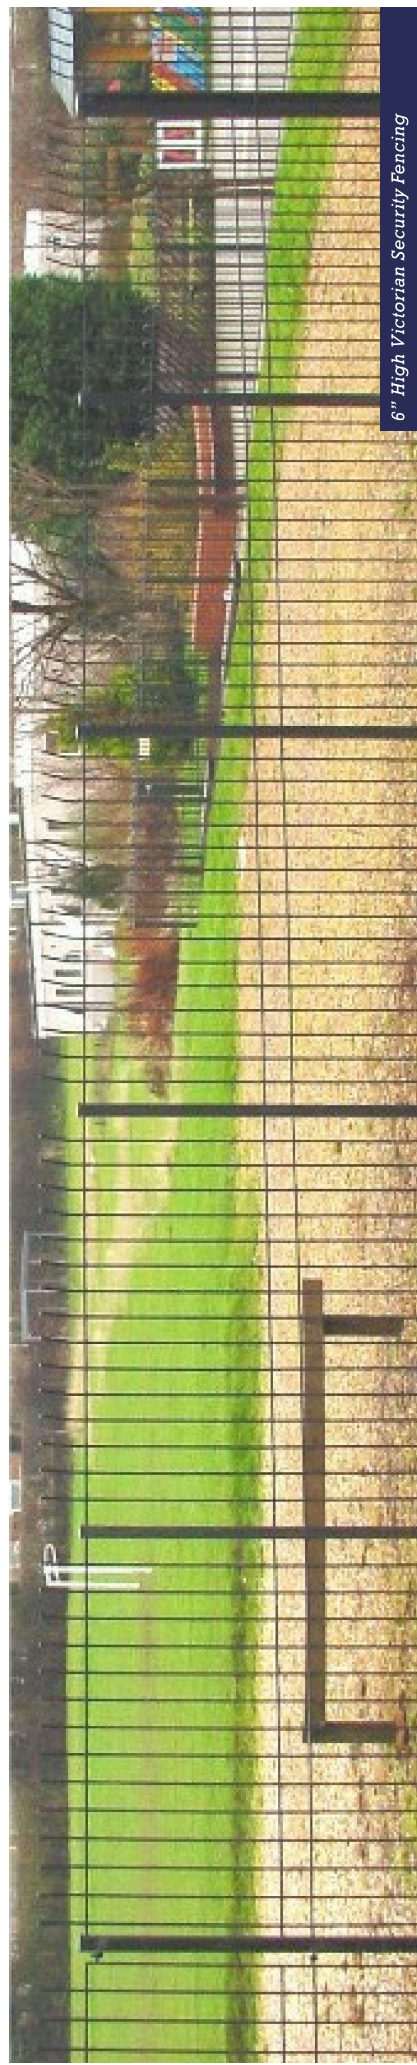

which are designed for either manual or automatic operation and these gates are matched by complementary fencing or walling. As we think that the customer security is important we fit (free of charge) locking bolts to our side-entry gates and a lock down bolt to our Double gates. We will also discuss any other security arrangements a customer may feel is necessary. We can only do this because each Gate is built to every customer's individual specifications and as a family business we believe in old fashioned service with genuine low prices.

Finest Quality Manual or fully Automated Gate Systems

Part of our extensive range of estate gates. Designed for the larger premises. These gates are made from solid 1½" by ½" (30 x 12 mm) frames & 5/8"(16 mm) Solid round uprights. There are 14 hand forged ornamental centres to choose from. These gates are very heavy & robust and are particularly suitable for automating Up to 14' Opening with posts

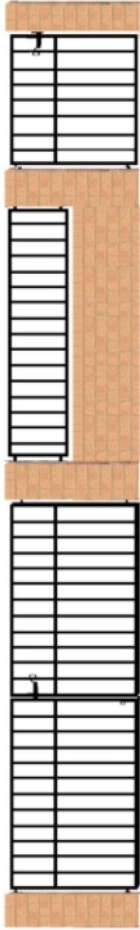

Fully Installed, Automated & Painted

Edwardian Style

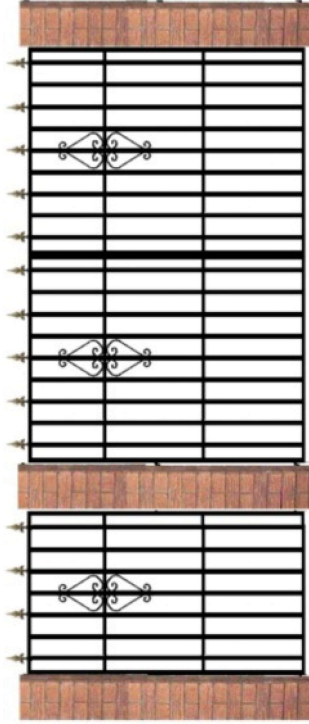

These two styles using railheads go well with Victorian type properties as well as a modern building. Usually painted in Black they look quite imposing when the railheads are fetched out in gold. The upright bars are made of strong half-inch solid round bars. The Edwardian-style has 4 " centers while the traditional style has 3 " centers between the bars
